

Central Western Zone reports that a notice of information from the Bradford CSD was recently mailed to Medicare Eligible Retirees, informing them that prescription coverage under Part D was available to them, if they were to drop or change their district provided prescription coverage. The notice was awkwardly worded and raised some concern from retirees. Contact with the district revealed that it was merely a mandated notice associated with "O'Bama Care", and that the district provided prescription coverage was still available to them. Medicare Eligible Retirees should be aware of this "mandated" notice.
